PROFILE

Software Engineer with 2 years of experience and a proven track record in Python and C++, machine learning, and DevOps, seeking a long-term Software Development Engineer (SDE) role to leverage technical, problem-solving, and interpersonal skills in driving innovative solutions and adding value to the organization, while enhancing skills and advancing career growth.

EXPERIENCE

Amadeus Labs, Bengaluru	<i>SDE 1</i>	July 2024 – Present
- Engineered core features for airline reservation and statistical components, for end-to-end booking-flow tracking and operational-data aggregation using C++, Python, MariaDB, Couchbase, ML, and web technologies. - Built Jenkins CI/CD pipelines across multiple repositories for PR validation, cron-based load jobs, and GitHub integration, reducing manual release and DevOps workload. - Led migration of multiple applications to Azure Cloud and standardized deployments with Docker, Kubernetes, OpenShift, Helm, and Argo CD, including service exposure & connectivity, routing, and service-integration configuration. - Migrated legacy scripts and dependencies to Jenkins workflows, configured Control-M batch jobs, and managed MariaDB patching, runtime configuration updates, credential rotation, and environment changes. - Upgraded Python components to newer versions, resolved compatibility defects, and migrated select components to C++. - Owned release engineering and DevOps operations, including load execution, monitoring, incident reporting, and maintenance/production defect resolution across components.		
Amadeus Labs, Bengaluru	<i>SDE Intern</i>	February 2024 – June 2024
Built an ML-based tool to optimize system performance and reduce failure rates in the booking reservation system using Python, Data Analytics, AutoML, and Explainable AI.		
Vivriti Capital, Chennai	<i>SDE Intern</i>	July 2023 – August 2023
Built an internal full-stack PDF reader tool for the finance team using Python, Java, and ReactJS to extract and display data from cloud-stored PDF documents in an interactive web interface.		

EDUCATION

Amrita Vishwa Vidyapeetham, Coimbatore	<i>B.Tech - Computer Science and Engineering</i>	GPA: 8.65/10 (Distinction)	2020–2024
CBSE, India	<i>Secondary & Senior Secondary School</i>	Grade 12: 94.2%; Grade 10: 94.6%	2020; 2018

TECHNICAL SKILLS

Programming: C, C++, Python, Java (5-Star HackerRank) Basics: Haskell, Go, Scala, R, ARM
Web Development: HTML, CSS, JavaScript, TypeScript, ReactJS, Angular, PHP
DevOps & Cloud: Docker, Kubernetes, OpenShift, Jenkins CI/CD Automation, Helm, Git, Azure Basics
Databases: MySQL, Oracle, MariaDB, NoSQL, MongoDB
Data Science, AI: Machine Learning, Statistics & Data Analysis, Time Series, NLP, Information Retrieval
Big Data: Hadoop, MapReduce, Hive, Pig, Cassandra, HBase, Spark, Sqoop
Software Systems: Operating System, Computer Networks, System Design, Linux CLI & toolchain
Tools: Git, GitHub, Visual Studio Code, GenAI-assisted development, StarUML, Grafana, Swagger

PERSONAL PROJECTS

ArogyaSathi - Healthcare App: Built predictive models for disease risk prediction using advanced ML, DL, and interpretable AI techniques, improving prediction accuracy.
Wikipedia Page View Forecasting: Modeled time-series patterns using Exponential Average, ARIMA, and Holt-Winters to forecast page views.
Sentiment Analysis on Hotel Reviews: Developed ML & NLP models to analyze sentiment from hotel review comments.
