PROFILE

Software Engineer with 2 years of experience and a proven track record in Python, C++, machine learning, and DevOps, seeking a long-term SDE 2 role to leverage technical, problem-solving, and interpersonal skills in driving innovative solutions and adding value to the organization, while enhancing skills and advancing career growth.

EXPERIENCE

- Amadeus Labs, Bengaluru** *SDE 1* July 2024 – Present
- Engineered core features for airline reservation and statistical components, for end-to-end booking-flow tracking and operational-data aggregation using C++, Python, MariaDB, Couchbase, ML, and web technologies.
 - Built Jenkins CI/CD pipelines across multiple repositories for PR validation, cron-based load jobs, and GitHub integration, reducing manual release and DevOps workload.
 - Led migration of multiple applications to Azure Cloud and standardized deployments using Docker, Kubernetes, OpenShift, Helm, and Argo CD, including service exposure, connectivity, routing, and service integration.
 - Migrated legacy scripts and dependencies to Jenkins workflows, configured Control-M batch jobs, and managed MariaDB patching, runtime configuration updates, credential rotation, and environment changes.
 - Upgraded Python components to newer versions, resolved compatibility defects, and migrated components to C++.
 - Owned release engineering and DevOps operations, including load execution, monitoring, incident reporting, and maintenance/production defect resolution across components.
- Amadeus Labs, Bengaluru** *SDE Intern* February 2024 – June 2024
- Built an ML-based tool to optimize booking system performance, reduce failure rates using AutoML & Explainable AI.
- Vivriti Capital, Chennai** *SDE Intern* July 2023 – August 2023
- Built an interactive full-stack Python web PDF reader which extract and visualize data from cloud-based documents.

EDUCATION

Amrita Vishwa Vidyapeetham, Coimbatore	<i>B.Tech - Computer Science and Engineering</i>	GPA: 8.65/10	2020 – 2024
CBSE, India	<i>Senior Secondary / Class 12 (AISSCE)</i>	Score: 94.6%	2018 – 2020
CBSE, India	<i>Secondary School / Class 10 (AISSE)</i>	Score: 94.2%	Apr 2018

TECHNICAL SKILLS

Programming: C, C++, Python, Java (5-Star HackerRank) | Basics: Haskell, Go, Scala, R, ARM

Web Development: HTML, CSS, JavaScript, TypeScript, ReactJS, Angular, PHP

DevOps & Cloud: Docker, Kubernetes, OpenShift, Jenkins CI/CD Automation, Helm, Git, Azure Basics

Databases: MySQL, Oracle, MariaDB, NoSQL, MongoDB

Data Science, AI: Machine Learning, Statistics & Data Analysis, Time Series, NLP, Information Retrieval

Big Data: Hadoop, MapReduce, Hive, Pig, Cassandra, HBase, Spark, Sqoop

Software Systems: Operating System, Computer Networks, System Design, Linux CLI & toolchain

Tools: Git, GitHub, Visual Studio Code, GenAI-assisted development, StarUML, Grafana, Swagger

PERSONAL PROJECTS

ArogyaSathi - Healthcare App: Built predictive ML/DL models for multiple disease risk prediction using interpretable AI, improving predictive accuracy.

Wikipedia Page View Forecasting: Built time-series models using EMA, ARIMA & Holt-Winters to predict page views.

Sentiment Analysis on Hotel Reviews: Developed ML & NLP models to analyze sentiment from review comments.

RESEARCH PUBLICATIONS

Comparative Analysis of Deep Learning and Machine Learning Models for Network Intrusion Detection

- ICCCNT Conference 2023 @ IIT Delhi.

Enhanced Botnet Attack Detection using Machine Learning and Neural Networks

- ICICTS Conference 2024 @ Tribhuvan University, Nepal.
